URDF

Debe estar fijo en la posición home

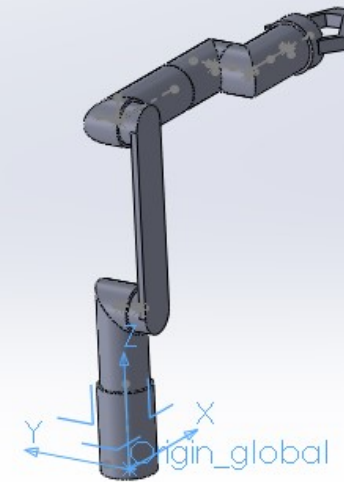

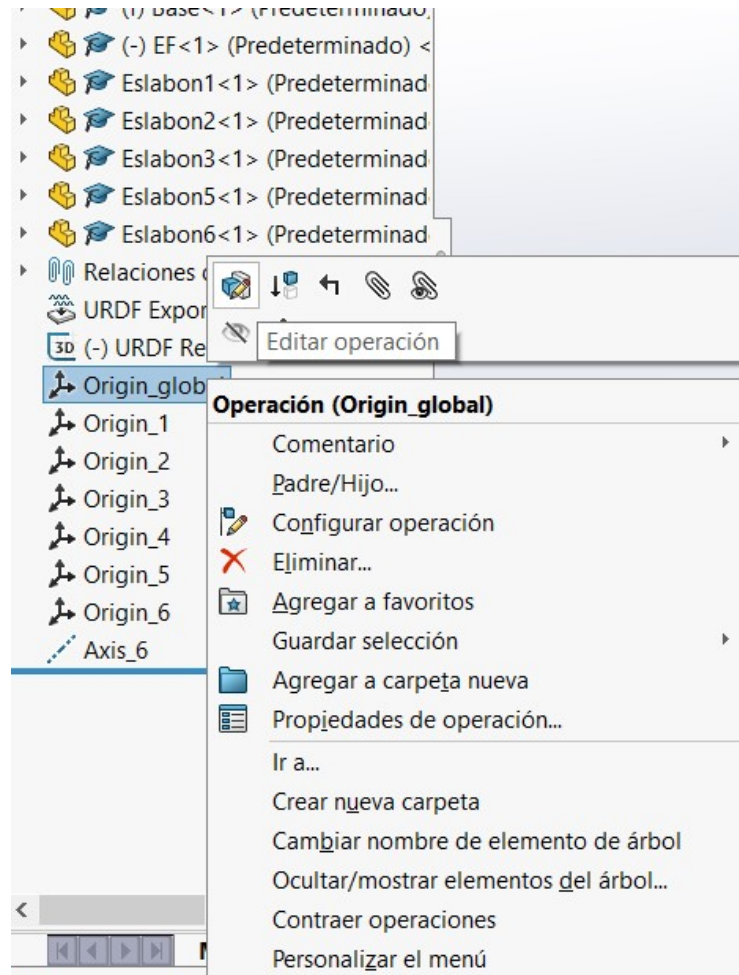

URDF

Se deben generar las relaciones entre juntas , se exporta y se genera el primer URDF (ESTE NO SE DEBE USAR) .

URDF

Una vez generado se deben modificar los orígenes, para que coincidan con la cinemática directa. y ahora si se genera el URDF (poner en continuo, las juntas rotacionales, las prismáticas deben limitarse).

URDF viewer

Se debe arrastrar la carpeta generada
